Professional Profile

A passionate and multi-skilled tech professional with a strong background in network surveillance, bot development, web applications, and data analytics. Adekunle combines hands-on industry experience with the creativity of a self-taught developer, building Telegram bots for token price tracking and sports predictions, alongside functional websites. Driven to learn, create, and deliver value in real-world scenarios.

Technical Projects

- Built a Telegram bot that tracks and posts live token price updates on a Telegram channel.
- Created sports prediction bots for football and basketball games, using historical data and trend analysis.
- Developed and deployed basic websites using HTML, CSS, and JavaScript.
- Integrated GitHub for version control and pushed working projects with documented code.
- Currently exploring Web3 tools and zero-knowledge proof setups on Ubuntu.

Technical Skills

- Programming: Python, JavaScript, HTML/CSS, API integration
- Tools: GitHub, Telegram Bot API, Flask, Jupyter, VS Code, Power BI
- Data: Pandas, NumPy, SQL, Data Visualization
- Web: Basic web dev, bot-to-web integrations
- Web3 & Blockchain: Solana, ZK Provers (Ubuntu), Token monitoring tools
- Networking: CCNA Certified, Cisco Networking Tools, Network Troubleshooting

Education

BSc. Mathematics (Computer Science and Statistics option), Ekiti State University, Ado Ekiti | 2005 - 2010

Work Experience

- Analyst, Network Surveillance - IHS Towers (2015 - 2024)
